

The overall project is to write a weekly report based on a spreadsheet export from Salesforce.

For this project, we need to generate synthetic Salesforce data and put the data in a spreadsheet. This is how the data can be exported from an enterprise Salesforce instance.

This is the requirements document for the synthetic data generation portion of this project. The synthetic data consists of fictional spreadsheet exports of fictional Salesforce opportunities for Public Sector customers.

The spreadsheet consists of one row per Salesforce opportunity. The fields in each row are the following:

Government Entity Name
Public Sector Market
Customer Person who is the Point of Contact - First Name + Last Name
Total List Price of Amazing Software Solution in US Dollars
Discount
Opportunity Type
Deal State
Amazing Software Products proposed
Solutions Engineer Recent activity
Solutions Engineer Next Activity
Product Gap
Competitor
Technical Win

The following sections of the document describe the field type and values for each field of the spreadsheet.

Government Entity Name - This should be a string that is one of the government entities listed below:

Public Sector Market - For each Government Entity Name below, Public Sector Market value is given at the start of the list. The valid field values for Public Sector Market designators are {Federal Civilian, Federal Defense, State and Local}

The entities listed below are in the Public Sector Market - Federal Civilian

Internal Revenue Service
Social Security Administration
Department of Transportation

Department of Justice
Department of the Interior
Department of Homeland Security
United States Postal Service

The entities listed below are in the Public Sector Market - Federal Defense

Army
Navy
Marines
Air Force
Space Force

The entities listed below are in the Public SEctor Market - State and Local

State of Alabama

State of Alaska

State of Arizona

State of Arkansas

State of California

State of Colorado

State of Connecticut

State of Delaware

State of Florida

State of Georgia

State of Hawaii

State of Idaho

State of Illinois

State of Indiana

State of Iowa

State of Kansas

State of Kentucky

State of Louisiana

State of Maine

State of Maryland

State of Massachusetts

State of Michigan

State of Minnesota

State of Mississippi

State of Missouri

State of Montana

State of Nebraska

State of Nevada

State of New Hampshire

State of New Jersey

State of New Mexico

State of New York

State of North Carolina

State of North Dakota

State of Ohio

State of Oklahoma

State of Oregon

State of Pennsylvania

State of Rhode Island

State of South Carolina

State of South Dakota

State of Tennessee

State of Texas

State of Utah

State of Vermont

State of Virginia

State of Washington

State of West Virginia

State of Wisconsin

State of Wyoming

New York, NY

Los Angeles, CA

Chicago, IL

Houston, TX

Phoenix, AZ

Philadelphia, PA

San Antonio, TX

San Diego, CA

Dallas, TX

Jacksonville, FL

Austin, TX

Fort Worth, TX

San Jose, CA

Columbus, OH

Charlotte, NC

Indianapolis, IN

San Francisco, CA
Seattle, WA
Denver, CO
Oklahoma City, OK
Nashville, TN
El Paso, TX
Washington, DC
Boston, MA
Las Vegas, NV
Detroit, MI
Portland, OR
Memphis, TN
Louisville, KY
Milwaukee, WI
Baltimore, MD
Albuquerque, NM
Tucson, AZ
Fresno, CA
Sacramento, CA
Mesa, AZ
Atlanta, GA
Kansas City, MO
Colorado Springs, CO
Omaha, NE
Raleigh, NC
Virginia Beach, VA
Long Beach, CA

Miami, FL

Oakland, CA

Minneapolis, MN

Tulsa, OK

Bakersfield, CA

Tampa, FL

Arlington, TX

Customer Person who is the Point of Contact - string of at least two words, maximum 40 characters). Generate a random name consisting of common first names and last names in the United States

Total List Price of Amazing Software Solutions - integer number representing US dollars, maximum 100,000,000

Discount - integer between 0 - 100, inclusive

Opportunity Type - string of maximum of 100 characters

Greenfield security customer

Greenfield Observability customer

On prem to cloud migration

Customer Renewal

Customer expansion

Deal Stage

The deal should progress through these stages in order.

1. Prospecting
2. Discovery
3. Proposal
4. Evaluation
5. Negotiation
6. Procurement
7. This stage is either "Closed Won", "Closed Lost" or "Delayed".

Amazing Software Products Proposed

This field should be one of these values {SIEM, SOAR, Observe, DEM, WAF, PlatformOnPrem, PlatformCloud, Work}

This is an explanation of each value.

SIEM - This is their Security Incident and Event Manager product.

SOAR - This is their Security Optimization Automation and Remediation product

Observe - This is their application Observability product.

DEM - This is their Digital Experience Monitoring Product for software applications.

WAF - This is their Web Application Firewall product.

PlatformOnPrem - This is their data analytics platform.

PlatformCloud - This is their SaaS offering

Work - suite of office work productivity tools including word processor, spreadsheet, presentation builder, email

Solutions Engineer Recent activity - (first call, to be scheduled, Proof of Concept, Discovery Call, Requirements definition, solution creation, demonstration, bakeoff, engage Product dev)

Solutions Engineer Next Activity - [first call, to be scheduled, Proof of Concept, Discovery Call, Requirements definition, solution creation, demonstration, bakeoff, engage Product dev]

Product Issues - {feature missing, poor performance, none}

Competitor - {Minisoft, MobStrike, Dynatrace, Goggles, Amaze, OldRelic, DataBlocks, InElastic, IBN, HPF, Other}

Technical Win - This field is either Yes or No.
