

Below is a sample of what the SFDCreport claudecode project should generate using the spreadsheet created in the format described in SFDCdatagen.pdf.

For the top 15 deals in Total List Price of Amazing Software Solution in US Dollars, each paragraph should cover one deal in this format:

Government Entity Name, Public Sector Market Segment, Total List Price of Amazing Software Solution in US Dollars, Opportunity Type, Solutions Engineer Next Activity, Product Gap (if it does not equal "none"), Competitor

The document should begin with a title and date.

Next the document should list the total number

Then it should list the number of deals where the Technical Win = no.

It should list the sum of the Total List Price of Amazing Software Solutions dollar value for all deals where Technical Win = no

The deals should be listed from the largest Total List Price to the smallest Total List Price among the top 15 deals according to Total List Price.

This is a sample of the report that shows the initial information followed by 2 deals. The actual output of this should include 15 deals.

Summary of Public Sector Sales Opportunities

Date - September 29, 2026

Total number of sales opportunities - 100
